Profile

Frontend Engineer with over 4 years of experience building scalable, production-grade web applications using React.js, Next.js, TypeScript, and modern JavaScript frameworks. Strong background in developing secure, high-performance user interfaces within fintech and marketplace environments, including financial onboarding, loan processing, transaction management, dashboards, and real-time data systems. Experienced in REST API integration, state management, and component-driven architecture. Adept at collaborating with cross-functional engineering teams in Agile environments to deliver reliable, maintainable, and user-focused solutions.

Technical Skills

Frontend

React.js, Next.js, Vue.js, Nuxt.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Styling

Tailwind CSS, Material UI, Sass

Architecture & Tools

Component Architecture, Reusable UI Systems, Responsive Design, Performance Optimization. Git, Agile/Scrum, CI/CD Collaboration, Testing & Debugging.

State Management

Redux, Context API, Zustand, RTK Query, Vuex

API & Integration

REST APIs, GraphQL, API Integration, Secure API Consumption

Soft skills

- Collaboration and Team work
- Critical thinking
- Problem solving
- Design thinking
- Communication
- Time Management and Organization
- Adaptability and Continuous learning

Work Experience

Frontend Engineer, Kuve Technologies

05/2025
Lagos, Nigeria

- Architected a real-time, AI-powered shopping assistant using Next.js, applying critical thinking to resolve complex latency issues and increasing search-to-cart conversions by 20%.
- Develop and maintain production-grade web applications using Next.js, React.js, TypeScript, and Tailwind CSS.
- Build scalable and reusable component architectures to support complex product listings, checkout flows, and onboarding systems.
- Collaborate closely with backend engineers to define API contracts and integrate RESTful services for real-time marketplace updates.
- Optimize application performance and improve user experience across devices through responsive design and accessibility best practices.
- Contribute to architectural decisions that improve code maintainability, scalability, and development speed.

Frontend Engineer, Creditwave Finance Limited11/2023 – 12/2024
Lagos, Nigeria

- Engineered a mobile-responsive fintech application supporting user onboarding, loan processing, savings management, peer-to-peer transactions, and secure financial workflows using React.js and Tailwind CSS.
- Integrated secure REST APIs to enable real-time financial transactions and customer data updates, improving data retrieval speed by 25%.
- Designed and implemented data visualization dashboards for administrators to monitor loan applications, approvals, savings, and transactions.
- Improved platform scalability and data management efficiency by 30% through optimized frontend-backend communication.
- Partnered with backend engineers and QA teams to ensure reliable feature releases in an Agile development environment.

Junior Frontend Engineer, Semicolon Africa(Enum)05/2022 – 11/2023
Lagos, Nigeria

- Built and maintained web applications using React.js, Vue.js, and TypeScript, delivering optimized and user-friendly interfaces.
- Developed modular frontend components and microservices to improve scalability and reduce debugging time.
- Collaborated in Agile sprint cycles, contributing to sprint planning, code reviews, and feature delivery, reducing project timelines by 15%.

Frontend Engineer Intern, Semicolon Africa(Enum)01/2022 – 04/2022
Lagos, Nigeria

- Developed interactive user interfaces using React.js, Redux, and Material UI.
- Built event-based calendar and engagement features to improve user interaction.
- Assisted in debugging and performance improvements, reducing production issues by 25%.

Education

Software Engineering, Semicolon Africa

06/2021 – 05/2022

B.sc Human kinetics, University of Lagos

10/2015 – 11/2019

Projects

Loan & Financial Services Platform , HTML, CSS, Javascript, Reactjs, Nextjs, Tailwind, SASS

- Built a fintech platform supporting onboarding, loan applications, savings, and transaction workflows.
- Implemented secure API integrations and dynamic dashboards for financial data monitoring.

Semicolon Africa Website , HTML, CSS, Javascript, VueJS, Nuxt, Tailwind CSS

- Collaborated with backend developers and other front-end developers to build the website. The features include Login and Sign up page, Learning and Management Platform for students.
- Consumed REST API using axios.

Enum , HTML, CSS, Javascript, React, RTK, Next js, Tailwind, SASS and other libraries

- This platform includes a Learning management platform, Recruiting platform and training platform.
- Built reusable and modularised components
- Consumed REST API using Axios

Cowbell Coffee Event Management System , HTML, CSS, Javascript, Typescript, React Js, Material UI, Tailwind CSS

Developed a responsive event management platform using React and Tailwind CSS.

Courses

Frontend Development, Testify Limited

04/2021 – 06/2021

Business Administration and Management,
Henley business school, University of Readings

2022
