OLASEHINDE YETUNDE RACHEAL

FRONTEND ENGINEER | REACT • TYPESCRIPT • NEXT.JS

Lagos, Nigeria | 08096393031 | olasehindey3@gmail.com

LinkedIn: https://www.linkedin.com/in/yetunde-olasehinde/ | Portfolio: rac-portfolio.vercel.app/ | GitHub

PROFESSIONAL SUMMARY

Frontend engineer with 4+ years building React, TypeScript and Next.js apps across fintech, ed tech, logistics and e-commerce. Built an AI shopping assistant that helped lift search-to-cart conversion by 20% and made a live store load fast on slow mobile networks. Cares about how products feel for real users, not just whether the code ships.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Vue.js, Nuxt.js, HTML5, CSS3

State & Data: Redux Toolkit, RTK Query, React Query, Zustand, Context API, REST APIs, GraphQL, Axios

UI & Accessibility: Tailwind CSS, Material UI, Chakra UI, Sass/SCSS, Responsive Design, Figma, WCAG fundamentals

Quality & Delivery: Git, GitHub Actions, CI/CD, Vercel, Jest, React Testing Library, Cypress, Code Reviews, Debugging

Application Engineering: Reusable Component Systems, Authentication, JWT, WebSockets, Lazy Loading, Code Splitting, Agile/Scrum, Jira

Development Tools: AI-assisted coding tools with human review and attention to code quality and data privacy

PROFESSIONAL EXPERIENCE

EMAX LOGISTICS — Frontend Engineer | Lagos, Nigeria *August 2026 – Present*

- Leading frontend redesign for Emax Logistics web platform — rebuilding authentication, dashboard, and workspace interfaces in React and TypeScript to improve load performance and UI consistency across devices.
- Redesigned LPMS shared component library, authentication screens, main dashboard, and workspace pages to improve UI consistency and maintainability.
- Developed frontend features for the Dispatch application, contributing to the company's broader product portfolio.
- Audited mobile performance under throttled 3G/4G conditions, identifying uncompressed images of 2–5 MB and page loads exceeding 11 minutes on Slow 4G. Reduced the logo asset from 552 kB to 40 kB and total page weight from approximately 20 MB to 1.2 MB through WebP/AVIF conversion, responsive images, and lazy loading.

KUVE TECHNOLOGIES LIMITED — Frontend Engineer | Lagos, Nigeria *May 2025 – May 2026*

- Built product discovery, listings, onboarding, and checkout workflows in React and Next.js for a live e-commerce platform serving mobile-first shoppers.
- Developed reusable UI components and shared frontend patterns to improve consistency and maintainability across product experiences.
- Integrated REST APIs and real-time updates, collaborating with backend engineers on API contracts and dependable data flows.
- Contributed to an AI-powered shopping assistant and real-time shopping workflows; frontend latency improvements and product enhancements contributed to a 20% increase in search-to-cart conversion.
- Participated in frontend architecture decisions, code reviews, testing, debugging, and CI/CD workflows; implemented authentication and protected user workflows.

CREDITWAVE FINANCE LIMITED — Frontend Engineer | Lagos, Nigeria *October 2023 – December 2024*

- Built responsive fintech interfaces supporting onboarding, loan processing, loan top-ups and restructuring, savings, and peer-to-peer transaction workflows.
- Integrated REST APIs for financial transactions and customer-data updates, contributing to a 25% improvement in data retrieval speed.
- Developed reusable components and data-driven dashboards for loan applications, approvals, savings, and transaction monitoring.
- Worked with backend engineers, QA, designers, and product stakeholders through Agile development, testing, debugging, and release cycles.
- Focused on clear data presentation and reliable financial workflows across responsive user interfaces.

SEMICOLON AFRICA — Junior Frontend Engineer | Lagos, Nigeria *January 2022 – November 2023*

- Built and maintained web applications with React.js, Vue.js, and TypeScript, delivering responsive interfaces from product requirements and Figma specifications.
- Created modular, reusable components and integrated REST APIs using Axios to support dynamic application features..
- Participated in sprint planning, code reviews, debugging, and feature delivery, contributing to a 15% reduction in project timelines.
- Built event-based calendar and engagement features and supported production debugging, contributing to a 25% reduction in production issues.

PROJECTS

Online Solar Store [live link] | Next.js, React.js, TypeScript, Tailwind CSS, REST APIs, Claude AI, WebSockets

- E-commerce store for solar products, serving mostly mobile shoppers in Nigeria arriving from Meta ads. Optimized for fast loading on low-bandwidth 3G/4G connections.

Emax Logistics App | Next.js, React.js, TypeScript, Tailwind CSS, REST APIs, Claude AI, WebSockets

- Logistics partner platform. Leading the redesign of its web app, rebuilding the interface for a faster, more consistent experience across devices.

AI-Powered Shopping Assistant | Next.js, React.js, TypeScript, Tailwind CSS, REST APIs, WebSockets

- Developed responsive product-discovery and real-time shopping interfaces for an AI-powered shopping experience.
- Contributed frontend improvements associated with a 20% increase in search-to-cart conversion.

EDUCATION & PROFESSIONAL DEVELOPMENT

Bachelor of Science in Education (Human Kinetics) — University of Lagos, Nigeria | 2015 – 2019
Software Engineering Programme — Semicolon Africa, Lagos | 2021 – 2022
Frontend Development — Testify Limited | April 2021 – June 2021
Business Administration and Management — Henley Business School, University of Reading | 2022
