YETUNDE OLASEHINDE

FRONTEND ENGINEER | REACT • TYPESCRIPT • NEXT.JS • REACT NATIVE

Lagos, Nigeria | 07047943726 | olasehindey3@gmail.com
LinkedIn: linkedin.com/in/yetunde-olasehinde/ | Portfolio: rac-portfolio.vercel.app/ | GitHub: github.com/yetife

PROFESSIONAL SUMMARY

Frontend engineer with 4+ years building React, TypeScript and Next.js products across fintech, edtech, logistics and e-commerce, and now React Native mobile apps. Cut a logistics platform's page weight from 20 MB to 1.2 MB for users on slow 3G/4G, and built AI shopping flows that helped lift search-to-cart conversion by 20%. Cares about how products feel for real users, not just whether the code ships.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Vue.js, Nuxt.js, HTML5, CSS3

State & Data: Redux Toolkit, RTK Query, React Query, Zustand, Context API, REST APIs, GraphQL, Axios

UI & Accessibility: Tailwind CSS, Material UI, Chakra UI, Sass/SCSS, Responsive Design, Figma, WCAG fundamentals

Mobile: React Native, Expo, TanStack Query (offline caching), push notifications

Quality & Delivery: Git, GitHub Actions, CI/CD, Vercel, Jest, React Testing Library, Cypress, Code Reviews, Debugging

Application Engineering: Reusable Component Systems, Authentication, JWT, WebSockets, Lazy Loading, Code Splitting, Agile/Scrum, Jira

PROFESSIONAL EXPERIENCE

EMAX INNOVATION & TECHNOLOGY — Frontend Engineer | Lagos, Nigeria *Aug 2026 – Present*

- Audited mobile performance on throttled 3G/4G and found pages taking over 11 minutes to load on Slow 4G; cut total page weight from ~20 MB to 1.2 MB (logo 552 kB → 40 kB) with WebP/AVIF, responsive images and lazy loading.
- Built the frontend for TapCard (NFC digital business card) and Emax Invoice (invoicing app for Nigerian businesses) in React Native/Expo, including offline caching and draft autosave for users on weak connections.
- Leading the frontend redesign of the Emax Logistics partner platform (LPMS): shared component library, authentication, dashboard and workspace screens in React and TypeScript.
- Developed frontend features for the Dispatch application.

KUVE TECHNOLOGIES LIMITED — Frontend Engineer | Lagos, Nigeria *May 2025 – May 2026*

- Built product discovery, listings, onboarding, and checkout workflows in React and Next.js for a live e-commerce platform serving mobile-first shoppers.
- Developed reusable UI components and shared frontend patterns to improve consistency and maintainability across product experiences.
- Integrated REST APIs and real-time updates, collaborating with backend engineers on API contracts and dependable data flows.
- Contributed to an AI-powered shopping assistant and real-time shopping workflows; frontend latency improvements and product enhancements contributed to a 20% increase in search-to-cart conversion.
- Participated in frontend architecture decisions, code reviews, testing, debugging, and CI/CD workflows; implemented authentication and protected user workflows.

CREDITWAVE FINANCE LIMITED — Frontend Engineer | Lagos, Nigeria *October 2023 – December 2024*

- Built responsive fintech interfaces supporting onboarding, loan processing, loan top-ups and restructuring, savings, and peer-to-peer transaction workflows.
- Integrated REST APIs for financial transactions and customer-data updates, contributing to a 25% improvement in data retrieval speed.
- Developed reusable components and data-driven dashboards for loan applications, approvals, savings, and transaction monitoring.
- Worked with backend engineers, QA, designers, and product stakeholders through Agile development, testing, debugging, and release cycles.

SEMICOLON AFRICA — Junior Frontend Engineer | Lagos, Nigeria *January 2022 – October 2023*

- Built and maintained web applications with React.js, Vue.js, and TypeScript, delivering responsive interfaces from product requirements and Figma specifications.
- Created modular, reusable components and integrated REST APIs using Axios to support dynamic application features.
- Participated in sprint planning, code reviews, debugging, and feature delivery, contributing to a 15% reduction in project timelines.
- Built event-based calendar and engagement features and supported production debugging, contributing to a 25% reduction in production issues.

PROJECTS

Emax Invoice | React Native, Expo, TypeScript, TanStack Query | **invoice.useemax.com**

- Invoicing app for Nigerian businesses: create invoices, send them on WhatsApp or email as a link or PDF, and track payments. Built offline caching, draft autosave, payment and receipt flows, recurring invoices, team management, and reports with CSV export. Mobile app pre-release.

TapCard | React Native, Expo, Next.js, TypeScript | **tap.useemax.com**

- NFC business card: tap it on any phone and the owner's profile opens, with no app to install. Built the mobile app (onboarding, Google sign-in, profile editing with live preview) and redesigned the web app to match it.

Online Solar Store | Next.js, React.js, TypeScript, Tailwind CSS, REST APIs, WebSockets | onlinesolarstore.store

- Solar e-commerce store for mobile shoppers arriving from Meta ads, optimised for fast loading on 3G/4G. Guided "what are you powering?" entry points shortlist a kit for a home, shop or street.

EDUCATION & PROFESSIONAL DEVELOPMENT

Bachelor of Science in Education (Human Kinetics) — University of Lagos, Nigeria | 2015 – 2019
Software Engineering Programme — Semicolon Africa, Lagos | 2021 – 2022
Frontend Development — Testify Limited | April 2021 – June 2021
